Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 49,57. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: On page 8 into page 9, pins 51 and 57 are said to extend through the locking wheel to capture the cams 43. This is not consistent with the drawings. Also on page 9, "cam wheel lock 77" is incorrect.

Appropriate correction is required.

Applicant's election without traverse of the embodiment of Figs. 10 and 11 is acknowledged. In addition to the claims indicated as being nonelected, it is felt that claims 7 and 9 are likewise nonelected since the elected embodiment does not provide

for more than one cam. Consequently, the claims reading on the elected species are 1-3 and 10

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hedberg.

See the housing formed by 3,4, first cam 6, roller 11, cam lock 20, spring 5 and release cord 14.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
